Mr. Oscar Holloway
New England Telephone and Telegraph Co.,
Stern Square,
Springfield 8,
Mass.

Dear Mr. Holloway;

In connection with our proposed Class C loop to Mount Holyoke College in South Hadley, Mass., we would like to know which of the following situations will involve the least expense, along with the amounts for each.

1. A local loop from the "Jefferson" exchange in Holyoke to Mount Holyoke College, a line from the Holyoke exchange to the Northampton Central Office, and a local loop from the Northampton Central Office to Radio Station WCSR at Smith College, 10 $\frac{1}{2}$ Prospect Street. This line to WCSR is to be terminated in a standard four-terminal box and left for us to connect to our own equipment, just as a line brought to an athletic field.
2. The same as the above from WMHC to the Northampton Central Office, but with a line from the Northampton Central Office to the Amherst Central Office and a local loop from the Amherst Central Office to Johnson Chapel, Amherst College, to be terminated as above.

Whichever case, we'd like to have it figured on a twenty-four hour basis charged by the month, as we have arranged verbally before. This, we understand, is to be the same per mile rate as that now in effect on the existing line between Smith and Amherst.

If there are any questions on this, please do not hesitate to contact Frank Sanders, Assistant Technical Director for WAMF.

Thankin you in advance for what we know will be your usual aid and consideration, we are,

Very cordially yours,

cc: WCSR ✓
